Business Continuity & Disaster Recovery Policy

Date	Version	Author	Description	Approved By	Last Updated	Review Frequency	Next Review
August 25,2026	First Version	Azeez O. Yusuff	Business Continuity & Disaster Recovery Policy	Tony Stark	August 25,2026	Annually or Significant changes occur	August, 2027

Purpose

This policy defines the framework for maintaining business operations and recovering critical services during and after disruptive incidents, including natural disasters, cyber attacks, hardware failures, and cloud service outages.

Scope

Covers all business-critical systems, processes, personnel, and third-party services within Stark Industries Inc.'s ISMS scope, including its SaaS platform, infrastructure (AWS), code repositories, and internal operations.

Definitions

Term	Definition
Business Continuity (BC)	The ability to maintain essential functions during a disruption
Disaster Recovery (DR)	The technical restoration of IT systems and infrastructure
RTO (Recovery Time Objective)	The maximum acceptable time to restore a system
RPO (Recovery Point Objective)	The maximum acceptable data loss measured in time

Policy Objectives

- Minimize disruption to operations
- Protect life, data, and assets during disasters
- Ensure recovery of critical services within acceptable time frames
- Meet customer, legal, and contractual obligations

Critical Functions and Systems (A.5.32)

The following are classified as critical and must have defined BC/DR plans:

Function	System	RTO	RPO
SaaS Platform Availability	AWS EC2, RDS	4 hours	15 minutes
Source Code Repositories	GitHub	24 hours	1 hour
Internal Communication	Slack, Email	8 hours	1 hour
Customer Support Services	CRM / ticketing tool	8 hours	1 hour

Disaster Scenarios Addressed

- Cloud infrastructure outage (AWS region failure)
- Ransomware or malware attack
- Insider sabotage or accidental data deletion
- Power or internet disruption at HQ
- Loss of critical third-party services

Business Continuity Planning

- All departments must identify:
  - Critical processes
  - Minimum staffing levels
  - Workarounds for technology failures
- Remote work readiness is maintained for all employees
- Communication trees are updated quarterly for all teams

Disaster Recovery Planning (A.5.33)

- Backups are:
  - Automated, encrypted, and versioned
  - Tested monthly
  - Retained for a minimum of 90 days
- Infrastructure-as-code enables rapid redeployment of cloud environments
- DR procedures are stored offline and accessible to key personnel

Testing and Maintenance

- BC/DR plan is:
  - Reviewed **annually**
  - **Tested semi-annually** through simulations or failover drills
  - Updated after any significant incident or organizational change

Communication During Disruption

- Internal updates via Slack + SMS fallback
- Customer communication plan includes:
  - Email templates
  - FAQ updates
  - Incident status page (if available)

Roles and Responsibilities

Role	Responsibilities
CEO	Approves BC/DR strategy and authorises emergency declarations
Information Security Manager	Maintains the BC/DR plan and coordinates response
IT Infrastructure Engineer	Executes technical recovery procedures
Department Heads	Define and test department-level continuity plans
All Staff	Know their role in the event of a disruption

Policy Review

- This policy is reviewed **annually** or upon significant change to the environment or regulatory requirements.
